## Objective

Detail-oriented MERN Stack Developer experienced in building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Committed to delivering scalable, secure, and performance-driven solutions.

## Skills

- JavaScript - Core scripting language for dynamic web functionality.
- React.js - Frontend library used for building interactive UIs.
- Node.js - Runtime for building fast and scalable server-side applications.
- Express.js - Lightweight framework for creating RESTful APIs.
- MongoDB - NoSQL database used for high-performance data storage.
- Tailwind CSS - Utility-first CSS framework for fast styling.
- Git - Version control system for managing source code.
- HTML & CSS - Structuring and styling web pages effectively.
- MySQL - Relational database experience for structured data.
- OOP (Object-Oriented Programming) - Designing modular, reusable, and maintainable code.

## Projects

CRM Call Center (02/2025 - 03/2025)

Role: Frontend Developer - React.js, Redux Toolkit, REST API

- Admin dashboard to manage leads and agents
- Role-based modules and secure login system
- Real-time lead assignment and IP tracking features

Chat Application (08/2024 - 09/2024)

Role: Full-stack Developer - Socket.io, React, Node.js

- Real-time messaging, typing indicators, user authentication
